EDUCATION

SAPTHAGIRI NPS UNIVERSITY

2024-2028

Bachelor of Engineering -
Artificial Intelligence & Machine Learning

TOP SKILLS

- Full-Stack Development — React, JavaScript, Python, REST APIs, Backend Development
- AI Workflow Design
- Software Development
- User-centered Design
- AI for Product Development
- Cross-functional Team Leadership

PROJECTS

Health-Tech PWA & AI WhatsApp Chatbot

React • Python • Flask • Supabase • Gemini AI • WhatsApp Cloud API • Vercel • Render

- Built and deployed a full-stack health-tech PWA and WhatsApp chatbot designed to help parents access responses to children related concerns.
- Developed the React frontend and Python/Flask backend, integrating Supabase as the database layer and Gemini AI for intelligent response generation.
- Integrated the WhatsApp Cloud API to enable chatbot-based interaction and designed the AI workflow to generate database grounded responses rather than relying solely on generic AI output.
- Deployed the application using Vercel and Render, connecting the frontend, backend, database, and AI workflow into an end-to-end product.

ACHIEVEMENTS

₹1.5L+ Sponsorship Revenue

- Secured 4 sponsors — **The Indian Garage**, **Campa Cola**, **Fusion Groove**, and **Perimeter Salon** — generating **₹1.5 lakh**+ through sponsor outreach, pitching, and coordination.

Annual Fest 2026 – Event Leadership

- Conceptualized, led, and executed a standalone flashmob as the opening initiative for Annual Fest 2026, coordinating planning, participants, rehearsals, and on-ground execution.
